

Patient Safety Plan Fiscal Year 2022-23 - Northumberland Hills Hospital (NHH)

Note: Patient safety is identified as a strategic priority for NHH

Patient Safety Goal	Objective	Target	Time frame
Barcode Medication Administration	We aim to eliminate preventable harm associated with medication adverse events. Implementation of Epic including BCMA for all inpatients and ED, drug administration via BCMA is currently trending at 50%. We strive to 90% as our internal benchmark for BCMA, relative to current compliance rate of ~50%.	90%	2022 - 2023
Discharge summaries	We strive to ensure patients are equipped with right information at the right times. We aim to deliver discharge summaries to primary care providers with 48 hours, establish a baseline for current rate for current compliance.	100%	
Best possible medication discharge plan	We strive to ensure patients equipped with right information at the right times to drive effective care. We aim to generate best possible medication discharge plans to our patients on discharge.	90%
